Augmented reality - Wikipedia

Augmented reality (AR) is an interactive experience of a real-world environment where the objects that reside in the real-world are "augmented" by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory, and olfactory.

Augmented Reality Company | Expert AR Services

Augmented reality apps combine live video with computer-generated images, sounds, videos, or GPS data. AR projects blend digital content with the real world. The right augmented reality company is able to seamlessly blend digital and physical elements, resulting in stunning imagery.
