The Difference between a Vision Screening and a ...

A vision screening is a relatively short examination that can indicate the presence of a vision problem or a potential vision problem. A vision screening cannot diagnose exactly what is wrong with your eyes; instead, it can indicate that you should make an appointment with an ophthalmologist or optometrist for a more comprehensive dilated eye examination.

Vision Screening - Pickering Town Centre Optometric Clinic

Vision screening sometimes determines an immediate need for vision testing. It's important to not confuse the two. A vision screening is not a substitute for a vision test or comprehensive eye exam performed by an eye care professional.

Vision Screening AAPOS

Vision screening is an efficient and cost-effective method to identify children with visual impairment or eye conditions that are likely to lead to vision loss so that a referral can be made to an appropriate eye care professional for further evaluation and treatment.

Child Visual Health and Vision Screening Protocol, 2018

Vision Screening: A relatively short sequence of tests that can detect some potential risk factors of certain vision

disorders. A vision screening cannot diagnose vision disorders nor is it a replacement for a comprehensive eye examination conducted by an optometrist. Vision screenings may indicate when a referral to an optometrist is necessary, but a comprehensive eye exam is a more fulsome

Eye Test - Download a Free Eye Chart - allaboutvision.com

Eye charts can be configured in various ways, but generally, if during an eye test you can read the big E at the top but none of the letters lower than that, your vision is considered 20/200. That means you can read at 20 feet a letter that people with "normal" vision can read at 200 feet. So at 20/200, your visual acuity is very poor.
